

High-power continuously tunable laser

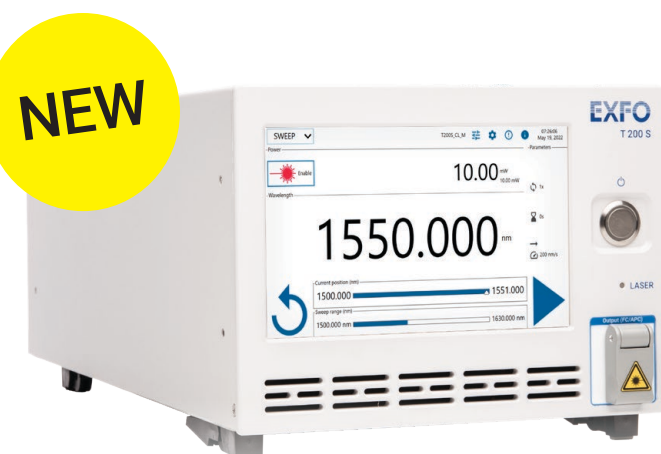

Faster and highly reliable testing for optical components, including photonic integrated circuits

EXFO

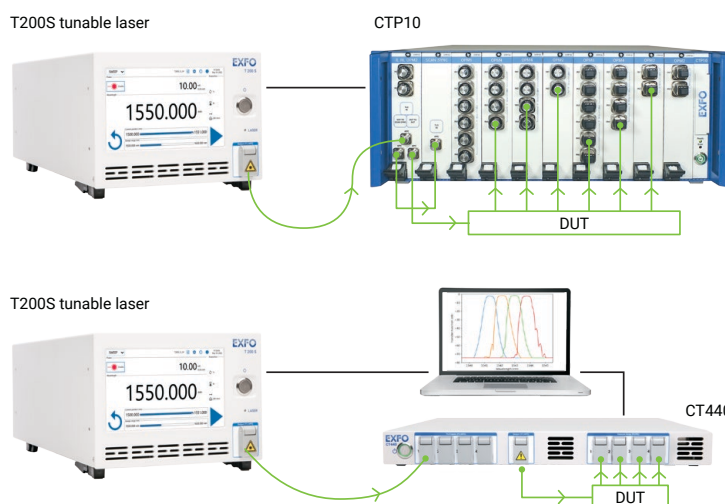

Meet the NEW T200S!

Reliable tests, faster.

This high-power continuously tunable laser comes in a compact form factor and is loaded with industry-leading features.

The T200S can be used with EXFO's passive component testers to provide a turnkey testing solution that is scalable, cost-effective and interoperable with third-party systems.

KEY FEATURES

- Up to 200 nm/s scanning speed
- Nominal 10 dBm over full tunable spectral range
- Ultra-low spontaneous emission
- Wavelength coverage: 1500 - 1630 nm
- Compact form factor
- Wavelength tuning and continuous sweep modes
- Active mode-hop-free operation

APPLICATIONS

- Testing WDM multiplexers
- Testing photonic integrated circuits (e.g., AWG, ring resonator)
- Multipurpose tunable laser for R&D

We are here to help.
